## Recycling Offered by All Residential Waste Collectors

# RECYCLE IT RIGHT!

It is extremely important to make sure only the correct items go in your curbside bin. By recycling the correct items, you are making the entire system efficient and ensuring success of the recycling program! All companies collecting residential curbside waste also collect curbside recyclables.

### You should always check with your hauler to find out:

1. what can be placed in your curbside recycling bin (*since this can vary by hauler*)
2. how recyclables are to be prepared for collection (*for instance: recyclables that contained food or other residue should be rinsed and lids should be discarded.*)
3. when your recyclables will be collected

## Tips for Identifying, Storing and Transporting a Hazardous Waste

### Identifying Hazardous Waste (and remember, electronics are considered hazardous too!)

The following warning words on a container can alert you to the hazardous nature of its contents:

**Danger, Poison, Toxic, Corrosive, Volatile, Flammable, Inflammable, Combustible, Explosive, Caution, Warning, Harmful, Oxidizer, Irritant, Environmental Hazard**

### Proper Use & Storage of Hazardous Materials

**MOST IMPORTANT:** Follow the directions on the label.

Ask the dealer or manufacturer to provide more explanation if needed.

Don't use more of the product than is recommended.

Never mix products; this can lead to explosions or poisonous gas being released.

Use hazardous products in well-ventilated areas and always use gloves, eye protection and air purifying respirators whenever warranted.

Never eat, drink or smoke where hazardous products are being used.

Keep products in their original containers.

If you do have to use a different container be sure to label adequately to prevent poisoning and for safe use and disposal.

Store all hazardous products upright, tightly sealed, and away from pets, children and food.

### Transporting Household Hazardous Waste to a Hazardous Waste Collection

Never mix different chemicals! Toxic fumes or an explosion can result and it prevents recycling of the materials.

Leave waste products in their original containers, and make sure caps and/or lids are securely closed. Gasoline is highly flammable and should only be transported in purpose-designed gasoline cans or containers. Do not transport hazardous wastes in the same portion of your vehicle as humans or pets.

If the original container is leaking or damaged, place the entire container in a larger container such as a clean paint can, plastic bucket, or wrap securely with plastic. If you wrap up a container so that the original label cannot be seen, mark the contents to the best of your ability, and be sure to tell the collection staff what the contents are.

Separate different types of waste, such as paints, motor oil, batteries, pesticides, acids, etc. Place containers upright in sturdy cardboard boxes or plastic trays, and pad with newspaper. You may also want to line your car with plastic before you pack the car.

Put containers in trunk or rear of your car, not on passenger seats. Come straight to the Hazardous Waste Collection to avoid any problems with the waste.

Don't eat, drink or smoke while handling household hazardous wastes. Wash your hands after handling these materials. Never put hazardous waste into trash bags or trash cans. Lids can come off causing chemicals to mix and possibly creating dangerous reactions.

| <p>Alkaline and Zinc Carbon Batteries typically contain a manganese dioxide cathode and a zinc anode. The electrolyte in an alkaline battery is usually potassium hydroxide or sodium hydroxide, while in a zinc carbon battery the electrolyte is ammonium chloride or zinc chloride. In the past, mercury was added to these batteries to prevent corrosion and the creation of hydrogen gas. Recent laws have restricted the levels of mercury allowed in alkaline and zinc-carbon batteries. Today, alkaline batteries on the market are required to have zero -added mercury and are no longer hazardous.</p> <p>Source: PA Dept. of Environmental Protection</p> | <p>Best Buy Electronics<br/>(all locations)</p> <p>Home Depot<br/>Also accepts other types<br/>(all locations)</p> <p>Lowe's<br/>Also accepts other types<br/>(all locations)</p> | <p><u>Tips:</u></p> <p>Give away on Butler County's local Freecycle™ web site at: <a href="https://groups.freecycle.org/group/ButlerPA/posts/all">https://groups.freecycle.org/group/ButlerPA/posts/all</a></p> <p>Non-useable bikes are accepted at most scrap metal / auto wrecking yards that pay by the pound.</p> <div data-bbox="1073 1144 1502 1434" data-label="Image"> <p>The illustration shows a storefront for a 'bike shop'. ## Christmas Trees

### Tips:

Several municipalities in Butler County offer curbside pickup or dropoff each year for their residents. Call your municipality for details.

Certain landscaping / composting businesses offer dropoff after Christmas each year. This information will be found on [www.butlercountypa.gov](http://www.butlercountypa.gov) every year shortly before Christmas.

You can recycle/reuse your tree to grow mushrooms and at the same time help reduce the tree into compost. See: [www.mushroommountain.com](http://www.mushroommountain.com)  
You can use your tree to build brush piles and wind rows that provide cover for birds and other wildlife.

You can stand your tree outside after the holidays and decorate with homemade bird foods to help feed the wild birds during the cold winter season. Internet search: *Christmas tree bird feeder*

### SPECIAL NOTICE REGARDING BUTLER COUNTY'S HAZARDOUS WASTE AND ELECTRONICS COLLECTIONS

**Due to notification received in November 2021 that Butler County's household hazardous waste and electronics collection contractor is ceasing all operations immediately and permanently, collections are cancelled until further notice. A qualified contractor is being sought that may be able to continue these collections. This has been a very popular program and will hopefully be able to be operational again soon.**

Tips for Latex Paint:

Latex paint is not considered hazardous once it is COMPLETELY dry. To get paint to dry:

- \* leave lid off can – small qty
- \* mix cat litter or saw dust and leave lid off until dry
- \* buy packet of paint hardener available at most paint sellers

Once COMPLETELY dry, latex paint can be disposed of with your regular household trash.

Tip for Buying the Right Amount:

Most places that sell paint now have paint calculators (including online) to help you buy the right amount.
